

In 2025

Trust no one.

Teams, WhatsApp, Zoom, Slack...
Are they still safe?

CYBERSECURITY, LAW, GOVERNEMENT & SOVEREIGNTY

Digital sovereignty is a key component of State sovereignty.

Communications Assistance for
Law Enforcement Act

Cloud Act

Investigatory Powers Act 2016

Investigatory Power Act
2016

Loss of trust, penalties, cyber intelligence, cyber attacks, data exfiltration

Economic spying

Sovereignty

Privacy

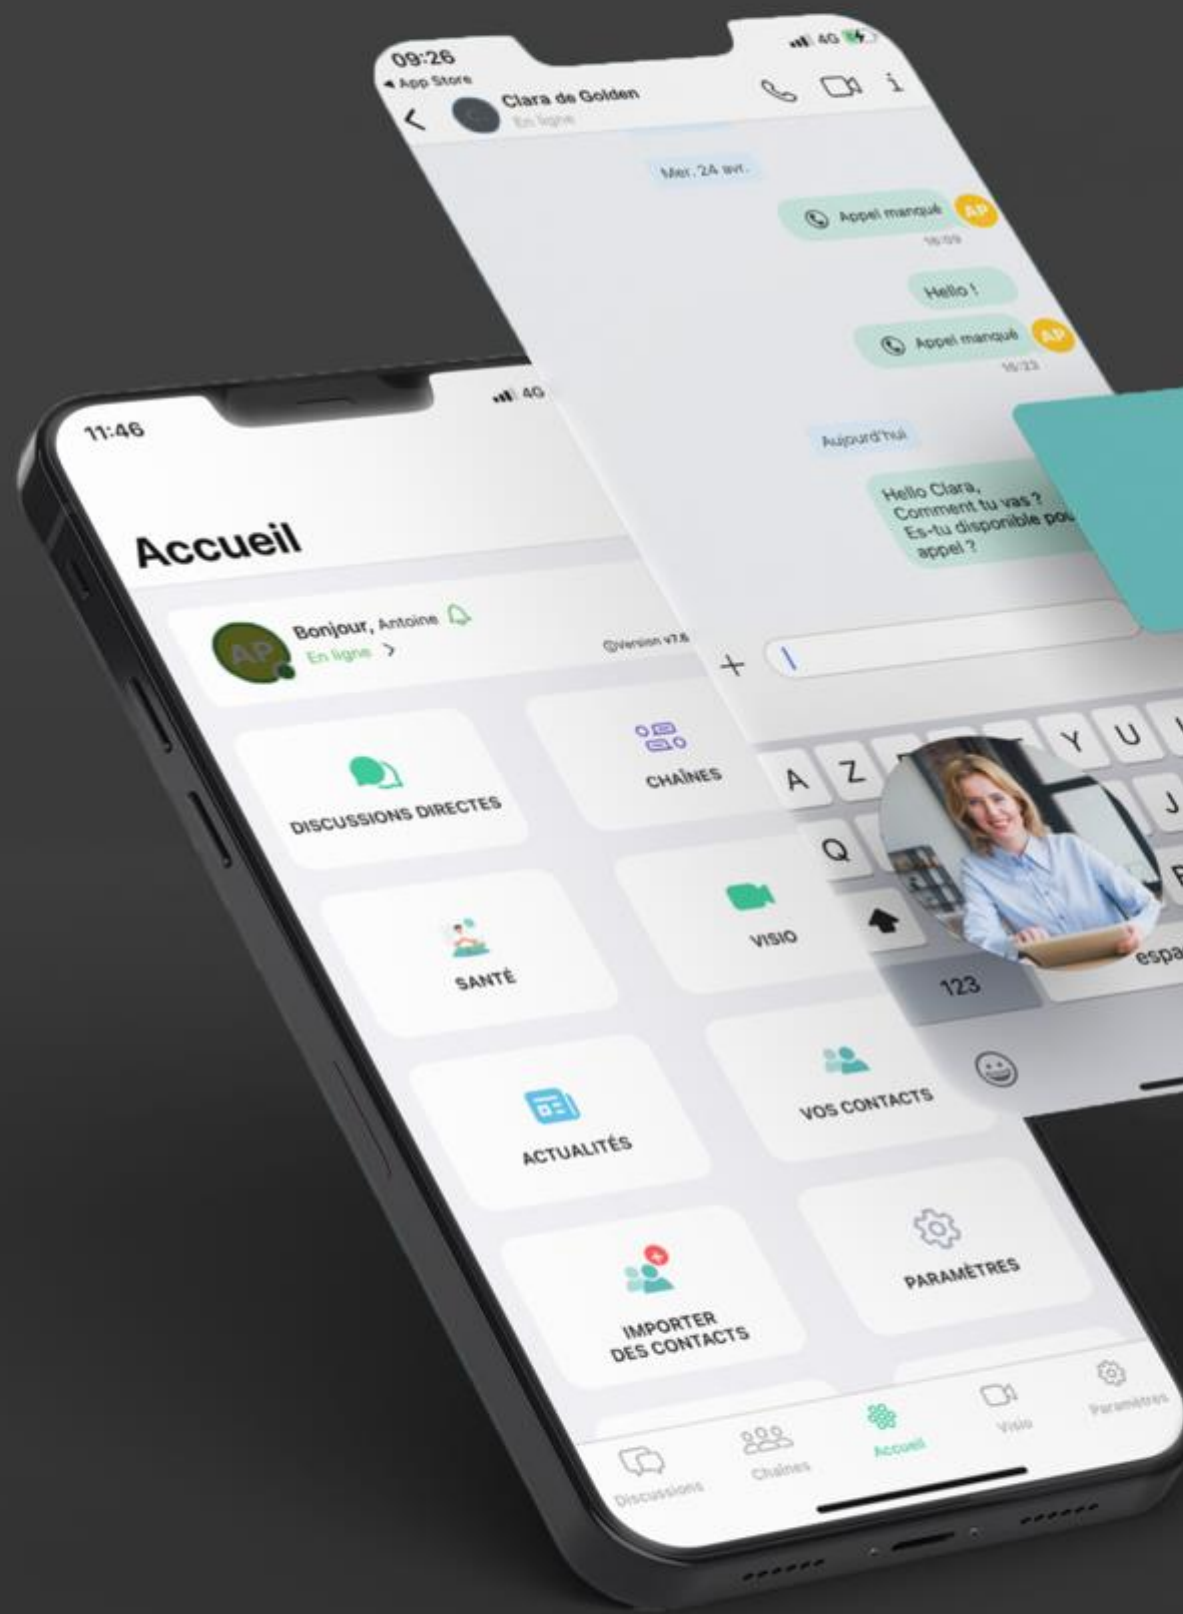

Deepfake

**Your data's security depends on
the sovereignty of your solutions**

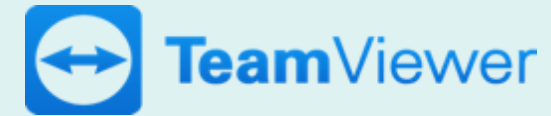

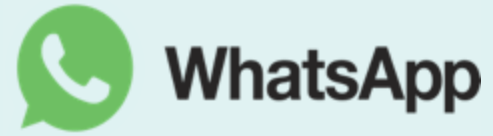

PRIVATE DISCUSS

Your Data,
Your Servers,
Your Control.

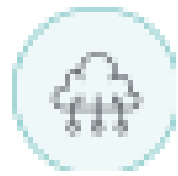

CYBERSECURISÉ - ON PREMISE OU SAAS OVH

ON-PREMISE • SAAS • AI-POWERED

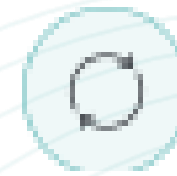

Sovereign solution

Data hosted on your on-premise infrastructures or in SaaS mode on private servers.

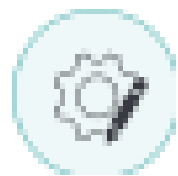

End-to-end encryption

Protecting your data with the highest level of security

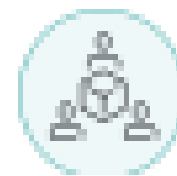

A resilient solution

Guarantees uninterrupted service, with a robust architecture

White Label

Complete customization of functions and visual identity

Proprietary technology

Customized, scalable solution

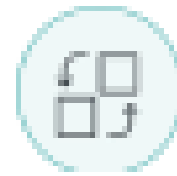

AI-Powered

No compromise on confidentiality (subtitling, real-time translation, automated reporting, etc.).

IF I ALREADY HAVE A SOLUTION,
WHY MAKE THE SWITCH?

Take control of your data and communications

**Replacement of
redflag Solution**

**Business continuity
and recovery plan**

**Quick to
deploy**

**No change management :
user-friendly interface**

**Easy integration of our
APIs into your systems**
